SUMMARY

Aspiring Computer Science student at SSN College of Engineering with experience in machine learning systems, scalable web applications, and data-driven software development. Built ML pipelines, distributed systems, and AI-powered applications through research, hackathons, and production internship experience. Interested in building intelligent systems combining ML, cloud, and full-stack technologies.

EDUCATION

B.E. Computer Science and Engineering, Sri Sivasubramaniya Nadar College of Engineering
Aug 2024 – Present
CGPA: 7.256/10

Diploma in Electrical and Electronics Engineering, Sri Moogambigai Polytechnic College Jun 2021 – Apr 2024
Percentage: 96.14% State First Rank Holder

TECHNICAL SKILLS

Languages: Python, JavaScript

Frameworks: React.js, Node.js, Next.js, TailwindCSS

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Docker, Kafka, Spark, VS Code

Concepts: Data Structures, OOP, Machine Learning, Distributed Systems, DBMS, OS, Computer Networks

EXPERIENCE

- **Software Engineering Intern (Winter Intern – Ongoing)** Dec 2025 – Apr 2026
Tech Lift Digital – Chennai (Remote)
 - Developed production features for a micro-SaaS platform using modern full-stack technologies.
 - Designed scalable backend and frontend modules improving system performance and reliability.
 - Utilized AI-assisted development tools to accelerate debugging, feature development, and deployment.

RESEARCH EXPERIENCE

- **Analysis of Financial Market Dynamics using Neurocomputing for COVID-19 Regime Transitions** 2025 – Apr 2026
 - Conducted ML-based financial market regime detection using Neural Decision States (NDS), achieving 96–98% accuracy with statistical validation.
 - Accepted for presentation at the International Conference on Technology and Information Systems (ICTIS Thailand 2026).

PROJECTS

ML-based Placement Prediction and AI Resume Optimization System – TechnoVerse Hackathon 2026 (Top 10 / 260 Teams)

- Developed an ML-based system to predict student placement probability and automatically optimize resumes using semantic search and ensemble models.
- Ranked Top 10 among 260 teams and awarded 10,000 for building an AI-driven resume tailoring and placement prediction solution.

Real-Time Credit Card Fraud Detection System

- Built a production-grade fraud detection system using Kafka, Spark, Docker, and ML models (95%+ accuracy), with end-to-end monitoring via Prometheus and Grafana.

SAP Hackfest 2025 – Sustainable Business Theme

- Participated in SAP Hackfest 2025 focused on sustainable business solutions; advanced to Round-2 by developing enterprise applications using SAP technologies.

Federated Client Selection — Heptagon ML Workshop

- Designed and implemented an optimized client-selection strategy for federated learning, improving training efficiency under non-IID data conditions.
- Built evaluation pipelines to analyze client performance, resource constraints, and contribution scores to enhance global model accuracy.

Inventory Management System (Java + MySQL)

- Built a Java Swing application with a MySQL backend for inventory control, featuring user authentication, audit logging, CRUD operations, and two-level stock alert reporting.

LEADERSHIP & ACTIVITIES & ACHIEVEMENTS

-
- **Top 10 Winner – TechnoVerse Hackathon 2026** Ranked among Top 10 out of 260 teams and awarded 10,000 for developing an ML-based Placement Prediction and AI Resume Optimization system.
 - **Finalist – SAP Hackfest 2025** Advanced to the final round by developing enterprise applications focused on sustainable business solutions.
 - Deputy Head of Sponsorship, SSN Lakshya Entrepreneurship Club Coordinated sponsor outreach and helped secure funding for major club events.
 - **State First Rank in Diploma in Electrical and Electronics Engineering (96.14%)**
